

SMI University – Student Information Handbook

This is a fictional sample university document created for practicing a RAG (Retrieval-Augmented Generation) project.

1. University Overview

SMI University offers undergraduate and postgraduate programs in Software Engineering, Computer Science, Business Administration and other disciplines. The university focuses on academic learning, practical skills and research.

2. Attendance Policy

Students are required to maintain at least 75% attendance in each course. Students who do not meet the minimum attendance requirement may not be allowed to appear in the final examination.

3. Examination Policy

The final examination carries 50% of the total course marks. Midterm examinations, quizzes, assignments and projects contribute to the remaining marks according to the course outline.

4. Grading System

The university uses a letter-grade system. Grades are assigned according to the student's overall performance in examinations, assignments, quizzes and projects.

5. Software Engineering Department

The Software Engineering department teaches subjects such as Programming Fundamentals, Object-Oriented Programming, Database Systems, Software Requirements Engineering, Artificial Intelligence and Web Engineering.

6. Library Rules

Students can borrow books using their university library account. Borrowed books must be returned by the due date. A fine may be charged for overdue books.

7. Leave Policy

Students who are unable to attend classes for valid reasons should inform the relevant department. Long absences may require supporting documentation according to university rules.

8. Student Support

Students can contact their department office for academic guidance, course registration issues and general university support.
